DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show / label: "DC remover, threshold detector, microprocessor, and memory" in Fig. 1; "phase detector, local sample clock, processor, and memory" in Fig. 5 as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claim 21 is rejected under 35 U.S.C. 102(b) as being anticipated by Janesch et al. (US 6,018,556).

Regarding claim 21, Janesch et al. disclose a method of adaptively adjusting timing loop parameters of a timing loop that is being used to synchronize a local clock frequency to a received signal, said method comprising the step of determining a frequency error between said local clock and said received signal and modifying said timing loop parameters based upon said frequency error. (as shown in Fig. 2; Col 6, L16-51)

4. Claim 21 is rejected under 35 U.S.C. 102(a) as being anticipated by applicant admitted prior art (AAPA).

Regarding claim 21, AAPA discloses a method of adaptively adjusting timing loop parameters of a timing loop that is being used to synchronize a local clock frequency to a received signal, said method comprising the step of determining a frequency error between said local clock and said received signal and modifying said timing loop parameters based upon said frequency error. (Background of the invention, L16-28)

Allowable Subject Matter

5. Claims 1-20 are allowed.

6. The following is an examiner's statement of reasons for allowance:

None of the prior teaches or suggests a method for adapting a timing loop having timing loop parameters to an environment having a broad range of frequency errors, the method comprising the steps of: setting the timing loop parameters of the timing loop to initial values; waiting a predetermined interval of time; measuring a frequency error between a receiver's clock signal and a received data signal; determining an average value of the frequency error; subtracting the average value of the frequency error from the frequency error to produce a difference value; and resetting the timing loop parameters to new timing loop parameter values if the difference value is less than a threshold value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
